

*OUTLINE OF TOPICS*

	PAGE
1. The faculties of memory and imagination in brutes and men	143
<i>1a.</i> The relation of memory and imagination to sense: the <i>a priori</i> grounds of possible experience in the synthesis of intuition, reproduction, and recognition	
<i>1b.</i> The physiology of memory and imagination: their bodily organs	144
<i>1c.</i> The distinction and connection of memory and imagination: their interdependence	
<i>1d.</i> The influence of memory and imagination on the emotions and will: voluntary movement	
2. The activity of memory	145
<i>2a.</i> Retention: factors influencing its strength	
<i>2b.</i> Recollection: factors influencing ease and adequacy of recall	
<i>2c.</i> The association of ideas: controlled and free association; reminiscence and reverie	
<i>2d.</i> Recognition with or without recall	146
<i>2e.</i> The scope and range of normal memory: failure or defect of memory and its causes	
(1) Forgetting as a function of the time elapsed	
(2) The obliviscence of the disagreeable: conflict and repression	
(3) Organic lesions: amnesia and the aphasias	
(4) False memories: illusions of memory; <i>deja vu</i>	147
3. Remembering as an act of knowledge and as a source of knowledge	147
<i>3a.</i> Reminiscence as the process of all learning: innate ideas or seminal reasons	
<i>3b.</i> Sensitive and intellectual memory: knowledge of the past and the habit of knowledge	
<i>3c.</i> The scientist's use of memory: collated memories as the source of generalized experience	148
<i>3d.</i> Memory as the muse of poetry and history: the dependence of history on the memory of men	
4. The contribution of memory: the binding of time	
<i>4a.</i> Memory in the life of the individual: personal identity and continuity	
<i>4b.</i> Memory in the life of the group or race: instinct, legend, and tradition	
5. The activity of imagination, fancy, or fantasy: the nature and variety of images	149
<i>5a.</i> The distinction between reproductive and creative imagination: the representative image and the imaginative construct	
<i>5b.</i> The image distinguished from the idea or concept: the concrete and particular as contrasted with the abstract and universal	150
<i>5c.</i> The pathology of imagination: hallucinations, persistent imagery	
6. The role of imagination in thinking and knowing	151
<i>6a.</i> Imagination as knowledge: its relation to possible and actual experience	
<i>6b.</i> The effect of intellect on human imagination: the imaginative thinking of animals	
<i>6c.</i> The dependence of rational thought and knowledge on imagination	
(1) The abstraction of ideas from images: the image as a condition of thought	
(2) The schema of the imagination as mediating between concepts of the understanding and the sensory manifold of intuition: the transcendental unity of apperception	152
<i>6d.</i> The limits of imagination: imageless thought; the necessity of going beyond imagination in the speculative sciences	
7. Imagination and the fine arts	

7a. The use of imagination in the production and appreciation of works of art	
7b. The fantastic and the realistic in poetry: the probable and the possible in poetry and history	153
8. The nature and causes of dreaming	
8a. Dreams as divinely inspired: their prophetic portent; divination through the medium of dreams	
8b. The role of sensation and memory in the dreams of sleep	154
8c. The expression of desire in daydreaming or fantasy	
8d. The symbolism of dreams	155
(1) The manifest and latent content of dreams: the dream-work	
(2) The recurrent use of specific symbols in dreams: the dream-language	
8e. Dream-analysis as uncovering the repressed unconscious
