

OUTLINE OF TOPICS

	PAGE
1. Conceptions of the highest human science: dialectic, first philosophy, metaphysics, natural theology, transcendental philosophy	166
2. The analysis of the highest human science: the character of dialectical, metaphysical, or transcendental knowledge	167
2a. The distinctive objects or problems of the supreme science	
2b. The nature of the concepts, abstractions, or principles of the highest science	
2c. The method of metaphysics: the distinction between empirical and transcendental methods	
2d. The distinction between a metaphysic of nature and a metaphysic of morals: the difference between the speculative treatment and the practical resolution of the metaphysical problems of God, freedom, and immortality	168
3. Metaphysics in relation to other disciplines	
3a. The relation of metaphysics to theology	
3b. The relation of metaphysics to mathematics, physics or natural philosophy, psychology, and the empirical sciences	
3c. The relation of metaphysics to logic and dialectic	
4. The criticism and reformation of metaphysics	169
4a. The dismissal or satirization of metaphysics as dogmatism or sophistry	
4b. Reconstructions of metaphysics: critical philosophy as a propaedeutic to metaphysics
