

THE GREAT IDEAS
From the Syntopicon

SOUL
OUTLINE OF TOPICS

1. Conceptions of soul	
<i>1a.</i> Soul as the ordering principle of the universe: the world soul and its relation to the intellectual principle; the souls of the heavenly bodies	
<i>1b.</i> Soul as the principle of self-motion or life in living things: soul as the form of an organic body	
<i>1c.</i> Soul as the principle of distinction between thinking and non-thinking beings: the identity or distinction between soul and mind or intellect	
<i>1d.</i> Soul as the principle of personal identity: the doctrine of the self; the empirical and the transcendental ego	
	PAGE
2. The analysis of the powers of the soul	80i
2a. The distinction between the soul and its powers or acts	
2b. The order, connection, and interdependence of the parts of the soul: the id, ego, and super-ego in the structure of the psyche	802
2c. The kinds of soul and the modes of life: vegetative, sensitive, and rational souls and their special powers	
(1) The vegetative powers: the powers proper to the plant soul	
(2) The sensitive powers: the powers proper to the animal soul	803
(3) The rational powers: the powers proper to the human soul	
3. The immateriality of the soul	804
3a. The soul as an immaterial principle, form, or substance	
3b. The immateriality of the human soul in comparison with the materiality of the plant and animal soul: the intellect as an incorporeal power	
3c. The relation of soul and body: the relation of formal and material principles, or of spiritual and corporeal substances	
3d. The denial of soul as an immaterial principle, form, or substance: the atomic theory of the soul	805
3e. The corporeal or phenomenal manifestation of disembodied souls as ghosts, wraiths, or spirits	
4. The being of the soul	806
4a. The unity of the human soul: the human mode of the vegetative and sensitive powers	
4b. The issue concerning the self-subsistence or immortality of the human soul: its existence or capacity for existence in separation from the human body	
4c. The origin of the human soul: its separate creation; its emanation or derivation from the world soul	807
4d ¹ . The life of the soul apart from the body	
(1) The doctrine of transmigration or perpetual reincarnation	
(2) Comparison of separated souls with men and angels	
(3) The need of the soul for its body: the dogma of the body's resurrection for the soul's perfection	808
(4) The contamination of the soul by the body: the purification of the soul by release from the body	
5. Our knowledge of the soul and its powers	
5a. The soul's knowledge of itself by reflection on its acts: the soul as a transcendental or noumenal object; the paralogsms of rational psychology	
5b. The concept of the soul in empirical psychology: experimental knowledge of the soul
